Expertise

DoD 8750/8140 Compliant
Systems Administration
PowerShell, Python & CLI
Linux (Foundational)
Process Improvement/Documentation
Identity and Access Management
Rubrik Data Protection & Recovery
Backup & Replication Management
Data Spill Response
Imaging, Wiping & Deployment
Change & Configuration Management
Incident & Security Operations
Threat & Risk Awareness
VMware vCenter
SSH / CLI Terminal (PuTTY)
ServiceNow
Asset Lifecycle Management
Technical Troubleshooting
Networking Fundamentals

Technical Education

LINUX+ CERTIFICATE
CompTIA - In-Progress

SECURITY+ CERTIFICATE
CompTIA - December 2025

RCSA CERTIFICATE
Rubrik - July 2025

CCNA CERTIFICATION
Cisco - May 2025

NETWORK+ CERTIFICATE
CompTIA - January 2025

A+ CERTIFICATE
CompTIA - November 2024

Career Summary

IT professional and U.S. Air Force veteran with a background in systems administration, backup infrastructure, and enterprise operations. Currently supporting Raytheon and Pratt & Whitney as a System Administrator, managing Rubrik data protection, SLA compliance, and onboarding of new environments.

Brings prior experience in service delivery, deskside support, and hands-on exposure to VMware vCenter and SSH-based terminal environments. Holds Security+, CCNA, Network+, A+, and RCSA certifications earned within 15 months, demonstrating consistent technical growth. Focused on building deeper expertise in infrastructure and security, currently pursuing Linux+ to formalize hands-on CLI and SSH experience gained in production environments.

Professional Experience

SYSTEM ADMINISTRATOR - **VSO (Raytheon / Pratt & Whitney)** Nov 2025 – Current

- Builds on Rubrik Administrator experience, expanding into full system administration with ownership of backup operations across multiple environments.
- Manage daily BDSR reporting, proactively identifying and resolving replication, VSS, and host-related issues to maintain backup reliability.
- Lead onboarding of new locations by completing TSDs, configuring SLAs, updating CMDB, and validating backups through successful test restores.
- Coordinate and execute environment handoffs, ensuring all backup, documentation, and reporting requirements are met prior to transition.
- Manage ServiceNow change requests, including agent installations and system updates, while collaborating with cross-functional teams to maintain stability.
- Leveraged VMware vCenter and SSH (PuTTY) for remote access and command-line work across virtualized backup environments.

SERVICE DELIVERY MANAGER - **VSO** Sep 2025 – NOV 2025

- Triaged and assigned inbound work to technical teams, ensuring SLA/SLO compliance.
- Oversaw communications with clients, partners, and delivery teams.
- Managed daily delivery tasks and team coverage for 24x7 managed services.
- Produced weekly, monthly, and quarterly reports for leadership and executives.

RUBRIK ADMINISTRATOR - **VSO (Raytheon)** Jun 2025 – Sep 2025

- Earned RCSA certification, building foundational expertise in Rubrik systems and administration through hands-on deployment exposure.
- Supported appliance installations and hyper-care activities, assisting engineers with deployment workflows and best practices in data center environments.
- Created and maintained Technical Support Documents (TSDs) to support Rubrik deployments and ongoing operational processes.

DESKSIDE SUPPORT TECHNICIAN - **VSO (contract with Raytheon)** Nov 2024 – Jun 2025

- Supported executive equipment refreshes, deployments, and secure device handling.
- Assisted with data spill remediation, re-imaging systems, provisioning drives, and ensuring security compliance.
- Conducted IOP audits, retrieved missing assets, and installed peripherals.
- Built an imaging station with custom cabling solutions to optimize preparation and workflow.
- Resolved hardware, software, and network issues via ServiceNow; managed loaner devices through deployment cycles.

QA AUTOMATION ENGINEER - **NewRez LLC / Caliber Home Loans** Feb 2016 – Feb 2024

- Progressed from Online Support Analyst to QA Automation Engineer, gaining experience in IT support and software testing.
- Assisted with manual and automated testing, including test case creation, validation, and deployment support.
- Developed internal tools and managed user provisioning and role-based access to improve efficiency and security.
